POWER FORENSICS & DIGITAL INTELLIGENCE

An ISO 9001:2015/27001:2022 Certified Company

powerforensics.in

Info@powerforensics.in

High-End Forensic Workstation

The Core of Modern Digital Investigations

BIS Certified (IS 13252, R-81019674)

A high performance forensic workstation designed for speed and reliability

DIGITAL EVIDENCE REVIEWING SYSTEM (DERS)

Forensic-Grade Reliability

Built for mission critical environments with enterprise grade stability and durability

High Performance

Multi-core processing, high-speed memory and SSD for faster analysis

Large Storage Capacity

Multiple drive bays to support massive data storage for large volume of evidence

Efficient Cooling System

Advanced cooling design ensures optimal performance even under heavy workloads

**ISO 9001:2015 /
27001:2022
CERTIFIED COMPANY**

Make In India Initiative

IDEAL FOR

Law Enforcement Agencies

Legal & Judicial Departments

Corporate Investigations

Cybersecurity Teams

Academic & Research Institutions

Our In-House Software Solutions

Block Sure

Portable USB WriteBlocker

- Supports USB 3.1 Port
- Internal or external workstation use.
- Can be as a standalone for field deployment

Make In India Initiative

Cyber Crime Scene Investigation Kit

Fully Customizable Field Investigation Kit!

- Ruggedized portable case design
- Field-ready toolkit for frontline investigators and LEAs
- Complete field acquisition toolkit
- Immediate deployment capability

Make In India Initiative

Critical for law enforcement and incident response teams requiring rapid, forensically sound data acquisition in the labs or at crime scenes.

Our In-House Software Solutions

Power Hasher

Accurate Hash Generation for Forensic Investigations

- Generate industry-standard cryptographic hashes including MD5 and SHA-256 to ensure reliable digital evidence verification.
- Simple drag-and-drop interface allows investigators to quickly hash image, video, or document files without complex setup.

Make In India Initiative

Digital COC

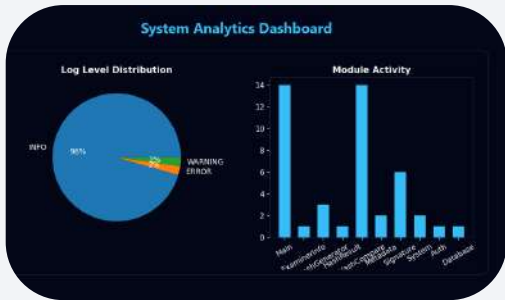

Court-Ready Chain of Custody System

- Android based lightweight Chain of Custody management solution with integrity for field investigators.
- Capture and record evidence details, photographs, witness information, and investigation officer details directly at the crime scene for accurate and immediate documentation.

Make In India Initiative

Critical for law enforcement and incident response teams requiring rapid, forensically sound data acquisition in the labs or at crime scenes.

Smart. Secure. Sovereign. Proudly Made in India!

High-performance forensic tools, designed & developed in India to protect the nation's digital landscape

Stellar Data Recovery

Comprehensive Recovery for Hard Drives, SSDs, USBs, RAID & Encrypted Volumes

- Wide-Ranging Data Recovery
- Cross-Platform & Encryption Support
- Forensic & IT Investigation Ready

Make In India Initiative

Cell-ID Extractor

Mobile Tower Detection & Forensic Tracking Device

- Multi-Network Cell ID Scanning
- Law Enforcement & Investigation Utility
- Software-Integrated Data Capture

Make In India Initiative

stellar®

SSES UTKARSH

Smart. Secure. Sovereign. Proudly Made in India!

High-performance forensic tools, designed & developed in India to protect the nation's digital landscape

IntFinder OSINT

Delivering real-time, actionable intelligence from open and breached data sources.

- Comprehensive Entity Search
- Enriched Intelligence
- Faster Investigations

Streamlines cybercrime and fraud analysis with efficient, cost-effective intelligence correlation

Make In India Initiative

Daksh CDR, IPDR Analysis

Your Gateway to Seamless Analysis in the Digital Realm

- High-precision review of raw CDR/IPDR data.
- Advanced monitoring of device activities and geolocations.
- Rapid processing of massive tower datasets.

Make In India Initiative

Smart. Secure. Sovereign. Proudly Made in India!

High-performance forensic tools, designed & developed in India to protect the nation's digital landscape

Vardand Crypto Investigator

Cryptocurrency forensics for Investigators that need clarity, control, and court-ready output

- Supports 19+ blockchains with comprehensive cryptocurrency.
- Automated artifact discovery from mobile extractions, databases, documents, and disk images.
- Advanced transaction tracing & connection graphs

Make In India Initiative

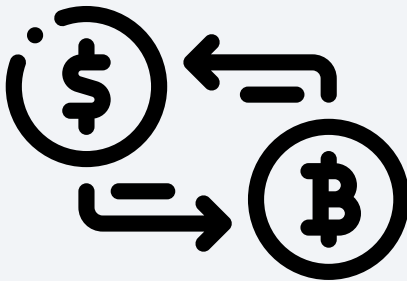

DERS GPU Powerstation

A high performance forensic workstation designed for speed and reliability

- Supports 3 GPU's at a time for high processing power.
- Efficient password cracking capability by utilizing GPU power.
- Useful for analyzing huge datasets from investigations.

Make In India Initiative

Smart. Secure. Sovereign. Proudly Made in India!

High-performance forensic tools, designed & developed in India to protect the nation's digital landscape

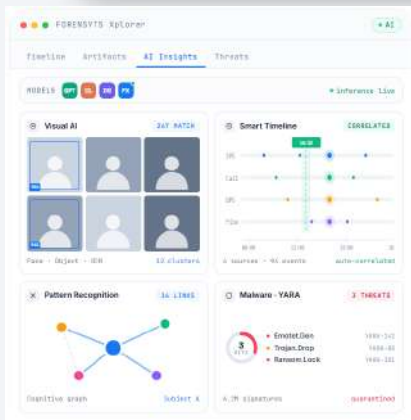

Xtractor

Extract data from source—computers, mobiles, feature phones, SIM cards, and embedded systems—even if encrypted, damaged, or locked. Supports **35,000+ devices** and **350+ apps** across 12,000+ versions.

Xplorer

Xplorer utilizes high-level machine learning to convert vast raw datasets into court-ready evidence. Combining visual intelligence tools like **facial recognition** and **OCR**. Streamlining cases by reconstructing complex event through **automated timelines** and **signature-based malware analysis**.

WORKFLOW

Avg. 6.4 hrs · seizure → court report

01

Acquire

Forensically sound extraction — logical, file-system, or physical — from any supported device.

02

Process

Parse, index, decrypt. Artifacts normalized into a single searchable timeline.

03

Analyze

Correlate across devices, run OCR / face recognition, surface patterns and leads.

04

Report

One-click court-ready report with hash verification and chain-of-custody audit log.

Solution for Field Acquisition & Imaging

Logicube Falcon Neo2

Next-gen field imager with blazing fast acquisition speeds!

- 5 concurrent tasks, 10 source+11 destination ports
- SAS-3(12Gbps architecture)
- Over 100GB/min for SSD's
- Field-deployable and portable design

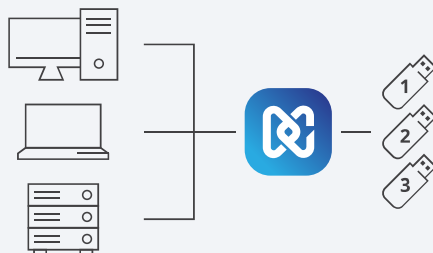

Ballistic Imager

Fastest forensic imager leveraging patented technology!

- 1TB drive captured in under 8 minutes
- Patented concurrent collection technology
- Imaging speeds up to 4x faster
- Unmatched speed and reliability

Critical for forensically sound data acquisition at the crime scenes.

Solution for Field Acquisition & Imaging

Forensic Imager TX2

Powerful, portable imaging device with touchscreen interface

- High speed data acquisition
- Advanced forensic functions built-in
- A premium, server-class powerhouse designed for high-performance lab environments

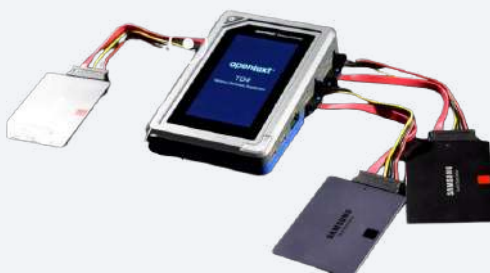

TD4 Forensic Duplicator

Compact, touch-screen forensic disk duplicator

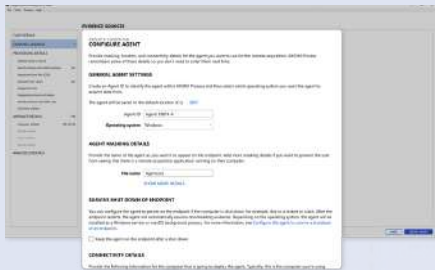

- Supports up to 5 destinations simultaneously
- Acquisition SATA/SAS, IDE, FireWire and NVMeS.
- Compact design

Critical for forensically sound data acquisition at the crime scenes.

The Interoperable Digital Investigation Platform

Magnet Forensics empowers teams to adapt to evolving digital challenges. Connect tools, automate workflows, and process limitless artifacts with unprecedented speed

Acquire relevant data remotely with **Axiom Cyber's** resilient "auto-resume & survive shutdown agent" technology and secure it in forensically sound containers.

Eliminate the complexity of fragmented video sources.

Magnet WITNESS offers a standardized, user-friendly platform for seamless video acquisition and forensic analysis.

Advanced **digital investigations** solutions for every industry

Your Investigative Edge Over

Forensic Teams

Investigators

Prosecutors

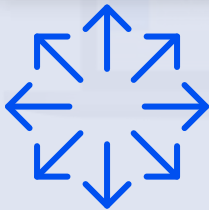

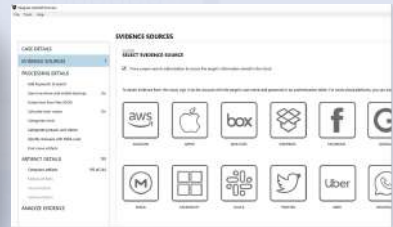

Military & Intelligence

Accelerate your investigations with connected tools and **high-velocity artifact processing**. Seamlessly access and share critical evidence through Magnet Forensics **Case Stream**, reducing time-to-intelligence and increasing lab efficiency.

Conduct thorough and resilient investigations across **Mac, Windows, Linux, Cloud, Drone** and **Vehicles** endpoints, regardless of their network location.

- Targeted Data Acquisition
- Resilient Connectivity
- Forensic Integrity

Flexible Integration for Modern Investigations
Eliminate data silos with a platform that is open by design. With our **Magnet ONE** framework your team can adapt quickly to new artifact types and varying investigative requirements.

The industry standard for accessing mobile data

Cellebrite Inseots is a powerful, all-inclusive solution that combines advanced extraction with next-generation analysis and speeds up to **2X** faster and **5X** more access

Cellebrite Pathfinder is an Investigative Intelligence platform that links suspects and criminal networks by analyzing of digital data. Streamline your workflow, visualize connections across cases

Analyze

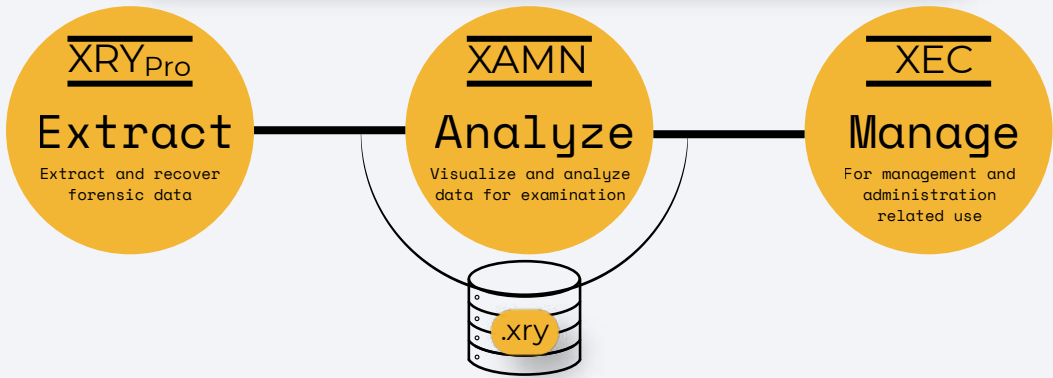

Protecting Communities, Nations and Businesses

Our Products

Access critical mobile evidence quickly, securely, and with forensic integrity. MSAB's advanced forensic ecosystem helps investigators accelerate investigations and uncover trusted digital evidence with confidence.

MSAB Platforms

MSAB provides its forensic solutions across both open and turnkey platforms. Open platforms run on traditional Windows-based systems with user-friendly point-and-click interfaces, while turnkey platforms are secure, purpose-built systems designed for streamlined touch-based forensic workflows.

Open platforms

Turnkey platforms

Providing Digital Forensic solutions to public sector and enterprise to help make the world a safer place

Oxygen Forensic® Detective a solution for extracting and decoding data from multiple devices. Simplify complex investigations by bypassing locks and unifying mobile, cloud, and computer forensics in one powerful platform.

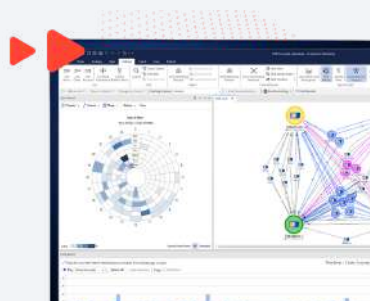

Oxygen Review Center A browser-based platform for real-time, remote evidence review. Enable multiple stakeholders to simultaneously analyze data, tag evidence, and generate reports.

Devices Supported

Transform complex investigation data into actionable visual intelligence to combat fraud and criminal networks.

Key Capabilities

Built for intelligence analysts, investigators, law enforcement, cybercrime units, and digital forensic professionals.

Visual Link Analysis

Reveal hidden relationships, hierarchies, and criminal networks.

Timeline Analysis

Track events, incidents, and communications chronologically.

Data Integration

Import CDRs, Excel, databases, forensic exports, and logs.

Pattern Detection

Identify anomalies, trends, and suspicious behaviors rapidly.

01

Collect Data
Import multiple intelligence sources

02

Analyze Relationships
Visualize entities & connections

03

Identify Patterns
Discover suspicious activities

04

Generate Intelligence
Deliver actionable insights

Pro

Streamline and Empower Your Crypto Intelligence

A specialized tool for visualizing cryptocurrency flows. **PangoLink** supports multi-chain analysis and KYC integration, enabling investigators to rapidly map criminal networks and generate court-ready reports.

CT Wallet Scan: Crypto Triage Quickly detect cryptocurrency evidence, including wallet addresses and private keys, across mobile and desktop platforms.

Ransomware Decryption Service

Expert data recovery and decryption for organizations hit by **ransomware**. Our specialists restore encrypted databases, virtual machines, and backup systems from major strains like LockBit and Phobos, ensuring business continuity with a money-back guarantee.

Decryption Process

1. Consultation
2. Trial Decryption
3. Verification
4. Final Recovery

Benefits

-  Enhanced Security
-  Maintained Chain of Custody
-  Regulatory Compliance
-  Transparency & Accountability
-  Secure Digital Asset Preservation

M-Key

M-Key is a secure cryptocurrency custody platform designed to protect, manage and control access to digital assets such as Bitcoin, Ethereum, USDT and cryptocurrencies.

It provides enterprise grade security for organizations handling high-value digital assets

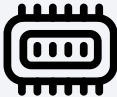

The world leader in encrypted electronic evidence discovery and decryption.

Seamlessly decrypt files, full-disk volumes, and mobile data within a single platform

Decryption solutions available for

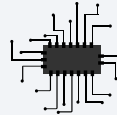

Files

ELCOMSOFT
DESKTOP, MOBILE & CLOUD FORENSICS

The Unified Decryption & Forensic Suite

Elcomsoft Premium Forensic Bundle: is an all-in-one kit for breaking through over **500 data formats**, including BitLocker, PGP, and VeraCrypt. It has advanced physical acquisition for iOS/Android and the world's fastest GPU-accelerated password recovery

- Break through data formats, including **BitLocker, PGP, and VeraCrypt**.
- Advanced physical acquisition for **iOS/Android** and seamless cloud data extract.
- Leverage patented **GPU acceleration** for the world's fastest password recovery.

Exterro's Unified Data Risk Management The only platform that integrates e-discovery, digital forensics, privacy, and cybersecurity compliance into a single, automated workflow.

FTK Enterprise

Tailored Tactical Solutions

A portable system for managing mobile connectivity in secure zones. It **selectively blocks unauthorized devices** while maintaining seamless service for authorized personnel.

Ideal for prisons and high-security facilities.

A tactical system for the high-accuracy positioning of cellular devices. Using advanced protocol methods and GPS extraction, it provides **real-time location updates** effective for last-mile field operations.

A **compact, handheld device** for high-accuracy pinpointing of 2G, 3G, 4G, and 5G targets. Optimized for **last-mile** operations, it ensures swift detection in crowded or indoor environments.

Tactical **Mass Messaging Broadcast** instant SMS alerts to all nearby devices independently of network providers. Ideal for **emergency response** and **crowd management**, can deliver critical warnings to thousands simultaneously.

Tailored Tactical Solutions

www.septier.com
**Septier
Wi-Fi Catcher**

A high-performance solution for detecting, analyzing, and controlling Wi-Fi networks and devices. It allows operators to identify targets with precision—while **enabling real-time network blocking**.

A tactical solution for extracting **IMSI, Wi-Fi, Bluetooth** across 2G to 5G networks. It features real-time target alerts and deep OSINT integration, available in **pocket, backpack, or vehicle configurations** for maximum operational flexibility.

www.septier.com
**Septier IMSI
Catcher**

A high-precision **counter-UAV system** that identifies and tracks drones and their pilots in real time. Using air-message analysis for **meter-level accuracy** with total airspace security.

www.septier.com
**Septier
Anti-Drone**

A high-accuracy passive sensor for pinpointing across 2G to 5G networks. Utilizing a 7-element antenna array with **360-degree coverage**, it delivers signal detection **with 2-degree precision**.

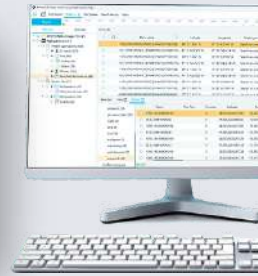

www.septier.com
Septier Archer

Belkasoft X Forensic

A comprehensive digital forensics suite that supports every step of investigation, from **mobiles, computers, RAM, and cloud sources** and in-depth analysis to building reports and sharing evidence.

Belkasoft Academy

Master Comprehensive, hands-on training programs designed to advance expertise in Digital Forensics and Incident Response. From foundational concepts to expert-level analysis.

PHONEXIA

Phonexia Voice Inspector

It's an on-premises, language-independent app using deep neural networks (Deep Embeddings™ / x-vector) for **1:1** and **1:N speaker identification** with **98%+ accuracy**.

The Intelligent Video Investigation Pipeline

Effortlessly capture and **retrieve** footage from any source like CCTV, body cams, or mobile devices for easy evidence creation.

Utilize advanced **Fast Review** technology to scan hours of footage in minutes, automatically detecting key events and subjects

A unified **Share Workflow system** to securely manage, store, and collaborate on video assets across the department.

Generate Fast Team Briefings and **comprehensive reports instantly** to share critical findings with investigators and legal teams.

MOBILedit Forensic PRO

**MOBILedit Forensic: Specialized
Solutions for Law Enforcement**

A powerful LEA solution for data extraction from **phones, smartwatches, and cloud services**. AI-driven analysis to recover deleted data and hidden app evidence, it functions as a standalone lab powerhouse or a vital tool for scientific image authentication.

FOCLAR

FORENSIC MULTIMEDIA ANALYSIS

SCANNING...

Foclars Impress

Solution for transforming low-quality footage into clear, actionable intelligence. Offers advanced filters to sharpen and enhance visual evidence.

Foclars Mandet

Platform for detecting digital manipulations and deepfakes. Enables investigators to distinguish authentic footage from forgeries, ensuring the integrity of visual evidence.

Prosoft Next-Gen IPDR & CDR Analytics a powerful analytical suite tailored to tackle big data in cybercrime investigations.

An innovative cybercrime investigation tool designed to solve the mystery of encrypted communication. **C5 CAT excels at identifying "B-Parties" in app-to-app calls (VoIP)** within massive IPDR datasets, providing guaranteed identification.

An industry-leading analytical platform for processing massive volumes of **CDR and Tower Dump data**. **C5 CDR** transforms millions of raw telecommunications records into actionable intelligence, **revealing suspect locations, associate networks, movement patterns.**

SECFORE
MOBILE FORENSICS

Quality, innovation, & customer satisfaction.

Visualizer

Visualizer empowers investigators to parse, decode, decrypt, analyze, and explore evidence. Powered by AI, it delivers unique insights.

Extractor

A comprehensive platform for forensically sound extraction of Android and iOS devices. Swift Extract offers the easiest plug-and-play solution on the market

Intelligence Engine

Secfore turns raw data into real intelligence, automatically linking evidence and accelerating breakthroughs across massive datasets.

OUR MAKE IN INDIA INITIATIVE SOLUTIONS FOR DIGITAL FORENSICS & CYBER CRIME INVESTIGATION

BlockSure USB Writeblocker (Portable/Integrated)

- Prevents data alteration during forensic acquisition with hardware write protection.
- Supports USB 3.0 for highspeed data transfers.

Digital COC

- Android based lightweight Chain of Custody management solution with integrity for field investigators.
- Capture and record evidence details, photographs, witness information, and investigation officer details directly at the crime scene.

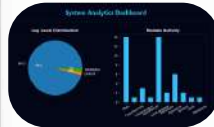

Tower Cell-ID Extractor

- Extract Cell-IDs from all nearby Cell Towers.
- Supports 2G,3G,4G,5G technologies.
- Comprehensive reports with geolocations
- No need of any external Sim Cards

Power Hasher

- Generate industry-standard cryptographic hashes including MD5 and SHA-256 to ensure reliable digital evidence verification.
- Simple drag-and-drop interface allows investigators to quickly hash files without complex setup.

Power Charging Station

- Simultaneously charge and manage multiple devices safely and efficiently.
- Overload protection and short-circuit protection.
- LED Internal temperature monitoring system.

Cyber Crime Scene Investigation Kit

- Ruggedized portable case design
- Field-ready toolkit for frontline investigators and LEAs
- Complete field acquisition toolkit
- Immediate deployment capability

Mobile Forensics Software

Extract data from source—computers, mobiles, feature phones, SIM cards, and embedded systems—even if encrypted, damaged, or locked. Supports 35,000+ devices and 350+ apps across 12,000+ versions.

Vardand Crypto Investigator

Deep Cross-Platform Discovery: Automatically scans documents, mobile extractions (including Cellebrite UFDR), databases, and disk images to uncover hidden keys, recovery phrases, and wallet artifacts.

Expert Digital Forensics & Cybercrime Services

Digital Forensics & Data Recovery

- Mobile Phone Data Acquisition
- GPS Forensics
- Hard Drive Data Acquisition
- Media Forensics
- Data Recovery & Decryption

Cybercrime & IP Investigations

- Cyber Crime Investigation & Consulting
- Property Theft Investigation
- Insider Threat Detection
- Email Forensics
- Log Analysis

Media Integrity & Legal Support

- Video Forensics & Enhancement
- Social Media Forensics
- Call Data Analysis
- Voice & Image Authentication

Training & Lab Setup

- Cyber Forensics Training (Basic to Advanced)
- Lab Setup for Academics & LEAs
- Academic Initiatives & Certifications

At Power Forensics, we believe in empowering the next generation of forensic professionals by bridging the gap between academic learning and real-world investigations.

ABOUT US

Power Forensics & Digital Intelligence (PFDI) is where innovation meets investigation.

We empower governments, enterprises, and institutions with advanced digital forensics and intelligence solutions that uncover truth and drive action.

Our expertise spans digital forensics, data recovery, cyber investigations, and forensic workstation manufacturing.

An ISO 9001:2015/27001:2022
